

Acknowledgements

This work has been a collaboration involving very many people, through general involvement in the conception and development of this book, and through specific inputs to particular taxon accounts. We sent draft accounts to more than 230 scientists with expertise on Australian mammal species (or with relevant international expertise for those mammal species also occurring beyond Australia). Almost all made time to review and annotate our drafts, correct misinterpretations, offer opinions, and contribute new information. All of these contributions were greatly appreciated, and served to ensure that the information presented here is as current as possible, and that our conservation assessments are as balanced, robust and defensible as possible. Many of these reviewers provided input on many taxa and our requests represented a very substantial impost. We acknowledge these reviews in each conservation summary, but wish to further acknowledge this assistance here. For their expert input we thank Ian Abbott, Chris Adams-Hosking, Alejandro Aguilar, Alana Alexander, Simon Allen, David Andrew, Kyle Armstrong, Bruce Atkin, John Augusteyn, Andy Baker, Robin Baird, Tina Ball, John Bannister, Alexander Baynes, Isabel Beasley, Joe Benshemesh, Alastair Birtles, Lucas Bluff, Don Bradshaw, Trevor Branch, Robert Brandle, Lyndon Brooks, Robert Brownell Jnr, Bob Bullen, Daniel Burns, Chris Burton, Daniele Cagnazzi, Maree Cali, Richard Campbell, Susan Campbell, Peter Canty, Gemma Carroll, Lisa Cawthen, Kate Charlton-Robb, Peter Christie, Chris Clague, Phillip Clapham, Andrew Claridge, Lucy Clausen, Jim Clayton, Sarah Comer, Annette Cook, Peter Copley, Laurie Corbett, Jonathan Cramb, Matthew Curnock, Chris Dickman, Anja Divljan, Joan Dixon, David Donnelly, Sean Doody, Michael Driessen, Peggy Eby, Glenn Edwards, Mark Eldridge, Teresa Eyre, Bronwyn Fancourt, Ron Firth, Clem Fisher, Diana Fisher, Tim Flannery, Peter Fleming, Samantha Fox, Tony Friend, Jody Gates, Jason Gedamke, Lesley Gibson, Al Glen, Ross Goldingay, Simon Goldsworthy, Greg Gordon, Tom Grant, Ken Green, Christine Groom, Nick Gust, Ian Gynther, Brooke Halkyard, Les Hall, Dalal Haouchar, Dave Happold, Robert Harcourt, Dan Harley, Jamie Harris, Elizabeth Hawkins, Matt Hayward, Kristofer Helgen, Richard Hill, Mark Hindell, Greg Hocking, Alan Horsup, Ric How, Kath Howard, Jennifer Jackson, Stephen Jackson, Alex James, David James, Maria Jeden-

We are especially grateful to Paula Jenkins (Natural History Museum, London) and Clemency Fisher (National Museums Liverpool) for taxonomic advice regarding *Sminthopsis fuliginosa*. Our apologies to any contributors who we may have inadvertently missed in this long roll call.

We thank Terry Reardon, Kyle Armstrong and the Australasian Bat Society for their very significant role in collating information and assessments on all Australian bat taxa, and for disseminating information on this project. We thank Cath Kemper and the Australian Mammal Society for their support and interest.
