

Acknowledgments

We thank Pat Hill (Georgia Southern University, Statesboro) for her excellent technical assistance in preparing the scanning electron micrographs. John R. Anderson (Connecticut Agricultural Experiment Station, New Haven) provided *I. banksi* material, Cluff E. Hopla (University of Oklahoma, Norman) provided *I. baergi* specimens, and Robert S. Lane (University of California, Berkeley) provided *I. jellisoni* and *I. neotomae* specimens. King Wan Wu (Centre for Land and Biological Resources Research, Ottawa, Canada) supplied unpublished records of certain species of *Ixodes* from Canada. Robert A. Restifo (Vector-borne Disease Unit, Ohio Department of Health) provided unpublished new state records for Ohio of *Ixodes brunneus* and *I. texanus*. J. Ralph Lichtenfels (USDA Biosystematic Parasitology Laboratory, Beltsville, Maryland) furnished tick records from the National Parasite Collection. Alma Smith (formerly Rocky Mountain Laboratory, Hamilton, Montana) prepared the drawings for Fig. 1, and H. Joel Hutcheson (Colorado State University) instructed us on computer scanning and labeling for that figure. We are grateful to Richard G. Robbins and Glen R. Needham for their meticulous reviews of this monograph. This study was supported by National Institute of Allergy and Infectious Diseases grant AI 30026.
