

Supplementary Figure S1. Western blot analyses with four types of antibodies. Crude protein extracts were made from 8 dpf larvae in RIPA lysis buffer. They were separated by SDS-PAGE and blotted onto a nitrocellulose membrane. Lane 1, anti-AtMef2 immunostaining. Lane 2, anti-AtSnail immunostaining. Lane 3, anti-At β -Gal immunostaining. Lane 4, anti-AtLoxhd1 immunostaining. Asterisks show major immunoreactive bands.
